

## Presentation Critique:

Have multiple people view your presentation.

### 1. Who critiqued your presentation?

Joel Raj

### 2. What feedback was the most helpful or valuable to you?

Joel pointed out my "Artist Strain" slide (Slide 12) which was basically just a huge block of text with a massive paragraph. He said that nobody is going to read that while I am talking about it. He also said I got a bunch of the stuff wrong. For example, Comic Neue is too informal for an AP Research Presentation. Also, on my Research Question slide I said "small artists" instead of "small independent visual artists."

### 2. What plans do you have to complete your Presentation and the Academic Paper?

I will convert the massive paragraph on slide 12 to three bullet points. Then I will change the font to something more academic like Helvetica or Arial and fix the research question to match my paper. For the academic paper I just need to do a final proofread to make sure everything is correct.

### 3. What are your unanswered questions or concerns?

Well the main thing I am concerned about is the time limit. With 18 slides I might end up going too fast or exceeding the time limit for my presentation.
